Storage Technology and Management
Assignment -2 (Class test)

Problem-01:

Social networking sites, such as *Facebook*, are very popular for social interaction. Write down the information life cycle of any social networking sites (example Facebook).

Problem-02:

Consider an application that generates 5,200 IOPS, with 60 percent of them being reads. Calculate the disk load in RAID 1, RAID 5 and RAID 6.

Problem-03:

Consider an example of an order processing system that involves a data center. Describe the component of that data center and illustrates their functionality in the business process.
